About me

Results-driven Full-Stack Developer with experience building high-performance web applications using React, Next.js (App Router), Node.js, and MongoDB. Skilled in API design, JWT/OAuth authentication, and database optimization (aggregation, indexing). Successfully enhanced system performance, reducing API latency from 3s to 100ms using Redis caching and asynchronous processing. Adept at designing modular, scalable architectures, managing version control with Git, and delivering clean, maintainable, production-ready code.

Technical Skills

- **Languages** : JavaScript (ES6+)
- **Frontend** : HTML, CSS, Tailwind CSS, JavaScript, React.js, Context API, Redux Toolkit, Next.js, GSAP, ScrollTrigger, Locomotive Scroll, Swiper.
- **Backend** : Node.js, Express.js, REST APIs, JWT, OAuth, GenAI APIs
- **Database** : MongoDB, Mongoose, Aggregation, Indexing, localStorage
- **Tools** : Git, GitHub, Postman, Vercel, Render

Internship

Sheryians Private Limited, Bhopal

Full Stack Intern

Project: Recruitment Website

[Live Preview]

- Architected a feature-based scalable full-stack system using Next.js (App Router) and Node.js, maintaining clear between UI layer, business logic, API contracts, and data access layers for high maintainability and scalability.
- Designed a repository-based backend architecture (Contract + Implementation pattern) enabling database flexibility, clean dependency inversion, and modular code organization for easier feature expansion.
- Optimized database performance by resolving the N+1 query problem using aggregation pipelines, indexing strategies, and reference-based schema design, improving overall system efficiency.
- Integrated Redis caching and asynchronous message queue processing for low-priority tasks, reducing API latency from 3s to 100ms and enhancing system responsiveness for end-users.
- Developed a centralized API abstraction layer with TanStack React Query, implementing server-state management, caching, background refetching, optimistic updates, and strict TypeScript typing to enforce strong frontend-backend contracts and reliable data flow.

Education

Technocrats Institute of Technology (TIT), Bhopal, Madhya Pradesh

Aug 2022 – June 2026

B.Tech – Artificial Intelligence Machine Learning (AIML)

Projects

Visionary-Architect – Animated Portfolio Website

[Live Preview]

- Developed an interactive, animated portfolio website using JavaScript, HTML, CSS, GSAP, Swiper, Locomotive Scroll, ScrollTrigger, and Lenis, creating smooth scrolling and engaging animations.
- Implemented advanced animations and transitions for all sections, improving user engagement and responsiveness across devices.
- Selected for final round of hackathon for innovative design and technical execution.

Multi-Vendor Food Delivery Platform- Full Stack Project

[Live Preview]

- Built a role-based food delivery platform supporting Owner, User, and Delivery Partner authentication with Google login and secure OTP-based password recovery.
- Developed a multi-shop ordering system where owners manage shops and food items while users can place and track orders across multiple vendors.
- Implemented real-time order updates and delivery assignment using Socket.io with live location tracking and OTP-based delivery confirmation.

Certifications

Full Stack MERN Development

Sheryians Coding School • Bhopal, MP • 2025
